SUMMARY

Computer Science undergraduate (CGPA 8.29/10) with hands-on experience in natural language processing, sentiment analysis, and predictive modelling. Built a full-stack AI Brand Intelligence System processing 10,000+ social posts per query run using VADER sentiment classification and LDA topic modelling. Seeking data science or machine learning internship roles.

EDUCATION

University of Engineering and Management (UEM), Jaipur <i>B.Tech in Computer Science Engineering – SGPA: 8.17/10.0</i>	Jaipur, Rajasthan July 2023 – May 2027
New Andul H.C. School <i>WBCHSE (Class XII) – 82.40%</i>	Howrah, West Bengal 2021
New Andul H.C. School <i>WBBSE (Class X) – 77.57%</i>	Howrah, West Bengal 2019

TECHNICAL SKILLS

NLP & AI: Sentiment Analysis (VADER, TextBlob), LDA Topic Modelling, Social Media Mining (Twitter/Reddit APIs)
Machine Learning: Predictive Modelling, scikit-learn, PyTorch, Computer Vision (OpenCV), SMOTE, GridSearchCV, Random Forest, Gradient Boosting
Data & BI Tools: Tableau, Streamlit, pandas, NumPy, Jupyter Notebook, EDA
Web & Databases: React.js, Node.js, REST APIs, MySQL, PostgreSQL, MongoDB
Languages & Tools: Python, Java, C++, SQL, Git, Docker, Tweepy, PRAW

PROFESSIONAL EXPERIENCE

AI/ML Intern <i>FlyRank AI (Remote)</i>	July 2026 – Present
- Working on the ML layer of the product – embeddings, clustering, and intent classification – to power search and recommendation features beyond API-level integration. - Collaborating with the product team to translate model outputs into user-facing insights and iterate on model performance.	
AI/ML & Business Intelligence Intern <i>Twidix (Remote)</i>	April 2026 – July 2026
- Build and ship full-stack AI/ML features for a live production platform, including [X]+ consumer-analytics dashboards, predictive insight tools, and workflow automation modules used by [Y]+ end users. - Implement data pipelines integrated into production using REST APIs and Git, partnering directly with the product team to lift key engagement metrics by [Z]%.	
Data Analyst Intern <i>Bluestock Fintech (Remote)</i>	April 2026 – May 2026
Analyzed 5+ financial and market datasets to support data-driven decision-making, cutting manual data-cleaning time by 25% through structured exploration and reporting workflows.	

PROJECTS

AI Brand Intelligence System <i>Python, NLP, LDA, Streamlit, React.js, Tweepy, PRAW</i>	2026
- Built a full-stack brand monitoring platform ingesting live Twitter and Reddit data, processing 10,000+ posts per query run through a 3-stage NLP pipeline (VADER/TextBlob sentiment, LDA topic modelling across 10 themes, keyword trend tracking). - Automated detection of top 5 consumer complaints and brand risks per cycle, cutting manual monitoring effort by 70%, and delivered insights via a 4-module Streamlit/React.js dashboard.	
Consumer Booking Behavior Prediction <i>Python, scikit-learn, pandas, NumPy</i>	2025
- Built an end-to-end ML pipeline on a 50,000-record airline dataset, engineering 15+ features and benchmarking 3 classifiers to achieve a cross-validated ROC-AUC of 0.88 (12% above baseline). - Corrected a 4:1 class imbalance with SMOTE and tuned 8 hyperparameters via GridSearchCV, producing a feature-importance report ranking the top 7 purchase-intent drivers.	
GenAuth AI – Real-Time Face Recognition System <i>Python, OpenCV, PyTorch, CNN</i>	2026
- Developing a CNN-based biometric authentication pipeline achieving sub-100ms inference latency across 500+ test frames from live webcam feeds. - Applying 4 data augmentation techniques (rotation, brightness shift, occlusion simulation, horizontal flip) to improve out-of-distribution accuracy by 11%.	

LEADERSHIP

Event Coordinator, AceHack 4.0 National Hackathon <i>UEM Jaipur</i>	2024 – 2025
Led operations for a 500+ participant hackathon across 12 colleges with a 20-person volunteer team, redesigning logistics workflows to cut wait times by 25%.	

CERTIFICATIONS

App Development Certification – EduSkills Foundation (2023) | Data Analytics Virtual Internship – Deloitte (2024) | Data Science Virtual Internship – British Airways (2024) | Quantitative Research Virtual Internship – J.P. Morgan (2024)
